Re: San Jacinto River Waste Pits

Dear Mr. Miller:

The heavy rains this past May are a good reason why the hazardous materials in the San Jacinto River Waste Pits should not be exposed for an 18-24 month period while being dug up and hauled away by trucks. The current cap has never leaked since its installation in 2011 and apparently did its job again during the recent heavy rains and flooding.

As a concerned citizen of Highlands, I am requesting that the EPA please choose Alternative 3 for remediation action for the Waste Pits.

Sincerely,

(b) (6)
